

27 July 1977

MEMORANDUM FOR THE RECORD

FROM : Clifford D. May, Jr.  
Director of Data Processing

SUBJECT: Issue #3 - EAG

1. On 26 July 1977 the EAG met to consider the ODP report on the DDCI ADP Issue #3. The EAG commented favorably on the report and generally agreed with its recommendations. However, in view of the possibility of major organizational changes stemming from PRM-11, they decided to suspend a final decision until after the impact of PRM-11 is known. They also agreed to reconsider this position in the event PRM-11 is delayed indefinitely.

2. The Acting DDCI, Mr. Blake, in commenting on the recommendations, set forth two principles that he felt should guide the EAG decisions:

a. No new organizational units should be established at DDCI level. His span-of-control is too great already.

b. We should think in terms of using existing organizational units that have the technical capability to do the job.

3. The Comptroller additionally felt that the new ADP planning/policy office probably should not be placed in the Comptroller's office because it would probably get absorbed in budget problems.

STATINTL

  
Clifford D. May, Jr.
